MAYOR'S ADDRESS.

GENTLEMEN OF THE CITY COUNCIL :

We meet under somewhat different circumstances from that of a similar meeting one year ago. Then a large majority of the City Council were new members. Now it is the reverse. A majority of us having had one year's experience, we shall enter upon our duties with a better knowledge of the work before us. Then comparative peace and prosperity spread over our happy country. To be sure, the political horizon at the South was dimmed by a slight haze, but nothing more than had appeared before, passing quietly away. One decided act would have averted the gathering storm. But it was permitted to gather strength until it burst upon the nation—a rebellion, in its savage developments, unparalleled in the history of civilized nations. In the language of loyal statesmen of the South, it is a rebellion without a cause—they having been protected in all their constitutional rights. But thanks to a kind Provi-

dence who has given us men for the emergency ! Yes, patriotic hearts rally around the standard of our country, ready to sacrifice and be sacrificed in its defence. Manchester has responded nobly to her country's call. Her patriotic sons have gone forth to meet the enemies of her country's flag, and others still are waiting their country's call, ready not only to meet foes at home but from abroad.

The most important subject to which your attention will be directed, is the financial affairs of the city. The year which has just closed has been attended with some extraordinary demands upon the treasury, in connection with the war, which with the ordinary expense will be fully set forth in detail in the yearly report.

The amount which is paid monthly for the relief of soldiers' families is large, and must be provided for by temporary loans or otherwise until the money is reimbursed by the State.

The large amount of uncollected taxes for the year 1859, will demand the attention of the City Council. The method adopted and practiced for the last two years for the collection of taxes works well for the interests of the city.

The recommendation of the Mayor last year that no bills should be contracted in behalf of the city without his knowledge, and that all bills against the city should be presented monthly for payment, has worked satisfactorily, and should be strictly adhered to in the future.

The Fire Department, under its present efficient

management, is fully equal to any emergency that may be likely to occur. All that is necessary to be said in favor of steam over hand engines is simply to point to the great saving of expense to the city, which will be shown by the yearly report.

The supply of water has been largely increased the past year by laying a 12 inch pipe from Chestnut street down Hanover street to the reservoir in front of the City Hall; also, connecting the pipe on Hanover street with the reservoir on Manchester street, affording an inexhaustible supply of water at each of the reservoirs. There has been built the past year at the junction of Elm and Myrtle streets, a reservoir containing more than 16,000 gallons of water. The Chief Engineer, having tested its capacity, informs me that it will be sufficient to meet any demand that will be likely to occur in that part of the city. There should be laid a pipe connecting the supply on Hanover street with the reservoir on Pine street, in the south-easterly part of the city. Then the compact part of the city will be well supplied with water. There is need of a new reservoir in Ward Seven, with a good supply of water, which was made apparent by the late fire in that section.

The Public Schools, under the efficient management of the School Committee and Superintendent of Public Instruction, are in a flourishing condition. I have visited all the public schools in the city during the past year, and have been highly gratified with the systematic discipline everywhere manifest-

ed, convincing me that the teachers had been wisely selected to govern as well as to teach.

The repairs of the streets and highways will require the ordinary appropriations. Granite Bridge will need to be covered with new plank the ensuing year. The paving of a portion of Elm street yearly, I believe is considered as good economy by our citizens. The building of new highways, unless absolutely necessary, should be dispensed with until returning prosperity visits our city.

The City Farm has been quite productive the past year. Those members of the City Council and other citizens who have visited the farm have expressed themselves as fully satisfied with the management. The production of the farm may be largely increased by a little extra expense in collecting manures.

The Police Department, in addition to the ordinary business of that department, have had their duties largely increased in consequence of the large number of persons temporarily residing in our midst, some of whom seem to act as though their position placed them without the pale of civil restraint, very much to the annoyance of quiet and order-loving citizens. It is the duty of all good citizens to strengthen the hands of the Police, both by precept and example, instead of weakening them by detraction and finding fault in the presence of the lawless.

The City Library is an institution creditable to the city, and should receive the fostering care of

the City Government. I would suggest the inquiry whether the ordinary expenses, aside from the appropriation for books, may not be considerably diminished.

The existing circumstances by which we are surrounded, demand of us the strictest economy in every department of the city expenditure.

In entering upon the work before us, may He who is the Source of all wisdom direct us in the faithful discharge of every duty.

DAVID A. BUNTON.

CITY OF MANCHESTER.

IN BOARD OF COMMON COUNCIL.

AN ORDER authorizing the Printing of the Sixteenth Annual Report of the Receipts and Expenditures of the City of Manchester.

ORDERED, if the Board of Aldermen concur, That the Joint Standing Committee on Finance be, and they are hereby authorized to cause two thousand copies of the Sixteenth Annual Report of the Receipts and Expenditures of the City of Manchester, including the Reports of the Chief Engineer of the Fire Department, the Overseers of the Poor, the Committee on City Farm, the Trustees, Librarian and Treasurer of the City Library, the School Committee and the Superintendent of Public Instruction, to be printed for the use of the inhabitants of said City, and that the expense thereof be charged to the appropriation for Printing and Stationery.

IN BOARD OF COMMON COUNCIL, JAN. 8, 1862.

Passed, ELBRIDGE G. WOODMAN, PRESIDENT.

IN BOARD OF MAYOR AND ALDERMEN, JAN. 8, 1862.

Passed, D. A. BUNTON, MAYOR.

A true copy, attest,

JOSEPH KNOWLTON, CITY CLERK.

FINANCE COMMITTEE'S REPORT.

CITY OF MANCHESTER, JANUARY 1, 1862.

The undersigned, Committee on Finance, in pursuance of the fourteenth section of Chapter Three of the Revised Ordinances, certify that we have examined the following account of Henry R. Chamberlin, City Treasurer, and find the same correctly cast, and all payments and expenditures therein charged against the City properly vouched.

We find that there has been received into the Treasury during the year ending December 31, 1861, including the balance on hand January 1, 1861, the sum of One Hundred Thirty-Two Thousand, Five Hundred Fourteen Dollars Eighteen Cents, (\$132,514 18), and that there has been paid from the Treasury, during the same time, the sum of One Hundred Eighteen Thousand Thirty-six Dollars Ninety-seven Cents, (\$118,036 97), leaving in the Treasury January 1, 1862, Fourteen Thousand Four Hundred Seventy-seven Dollars Twenty-one Cents, (\$14,477,21,) of which Ten Thousand Six Hundred Fifty-three Dollars and Forty-seven Cents, (\$10,653 47,) will be consumed in cancelling unpaid drafts.

SETH MILLIKEN,	}	JOINT STANDING COMMITTEE ON FINANCE.
C. W. ADAMS,		
D. A. BUNTON,		
J. ALLEN TEBBETTS,		

In Board of Mayor and Aldermen, January 6, 1862.

Read and accepted, J. KNOWLTON, *City Clerk*.

In Board of Common Council, January 6, 1862.

Read and accepted in concurrence.

S. D. FARNSWORTH, *Clerk*.

REPORT OF THE OVERSEERS OF THE POOR.

To the Mayor, Aldermen and Common Council of the City of Manchester :

In compliance with the requirements of law, the Overseers of the Poor of said City, herewith present their Annual Report.

Whole number of paupers assisted the last year, who had a settlement in the State, is 169 ; of which 128 have a settlement in this City, and 41 having a settlement in some other town in the State. There have died of the above number, 6 during the year, 4 belonging to this City, and 2 belonging to other towns in the State.

The greatest number of paupers at the City Alms House, during the year past, is 33, average number 12.

All of which is respectfully submitted,

D. A. BUNTON, CHAIRMAN.

S. S. MOULTON,	}	OVERSEERS
GEO. O. CLARK,		OF THE POOR,
JEREMIAH ABBOTT,		CITY OF
NAHUM BALDWIN,		MANCHESTER.

February 4, 1862. In Board of Mayor and Aldermen,
Read and accepted.

JOSEPH KNOWLTON, CITY CLERK.

February 11, 1862. In Board of Common Council,
Read and accepted.

O. C. MOORE, CLERK.

THE EIGHTH ANNUAL REPORT
OF THE
TRUSTEES OF THE CITY LIBRARY.

In accordance with the regulations, the Board of Trustees of the City Library respectfully submit their Eighth Annual Report, accompanied by that of the Librarian and Treasurer.

About a decade has passed since the establishment of this Institution, so quiet in its operation and so beneficent in its effects. The provision your honorable Board has in these years so wisely devoted to its wants, has not, we are persuaded, been wasted or in the smallest degree misappropriated.

The increase of books has been constant and of the most valuable character, until a selection of above eight thousand of the best known works in the English Language in the departments of Science, Art, Literature, History, Biography, Travels, Moral and Political Economy, is now in the possession of the City and accessible to all its citizens.

We call attention to the fact that the number of books of an ephemeral character is comparatively small, not a twentieth part in cost of the whole. All else, with some few unavoidable exceptions, such as will creep into every selection not made by actual perusal and deliberate judgment of the works purchased, (which you will see to be clearly impossible,) is in the highest degree worthy of preservation.

The chief and urgent want of the Library now, is a complete Catalogue on some simple and well arranged plan. Those at present in use, consist only of several indices of authors with varying arrangements, got up in the cheapest form and sufficient only for the necessities of the time when they were published. Having had in this respect the teachings of experience and consulted the methods in use in larger libraries, the Trustees will be prepared to recommend the publication of a suitable Catalogue, if your Honorable Board shall deem it best to make the requisite appropriation.

The care and trouble of the selection and purchase of new books, is of course daily increasing, the list already in our possession extending in its various departments beyond the personal knowledge of the Committee, and requiring the watchful attention of some one familiar with the current literature of the day. Experience and judgment is also indispensable to the proper care, preservation and collection of books, from time to time, to see that none are lost, or that they are not misused.

We invite the members of the City Council to personally inspect and judge for themselves of the faithful manner in which, under the charge of the Treasurer and Librarian, the affairs of the Library have been conducted.—In regard to this, the several reports herewith presented will give you some idea.

Our thanks are due, in behalf of the City to those gentlemen who have made donations of books, as appears by the Librarian's Report, and especially to his Hon. Ex-Mayor Harrington, for the valuable Library Editions of Scott and Dickens.

D. A. BUNTON, Mayor,
President Ex-Officio.

WM. C. CLARKE, Clerk.

LIBRARIAN'S REPORT.

Gentlemen of the Board of Trustees :

The Librarian respectfully submits his Eighth Annual Report.

The number of persons who, up to this time, have complied with the regulations for taking books is two thousand nine hundred and seventy-eight.

The number of books given out during the forty-two weeks which the Library has been open to the public, is nearly thirty thousand, out of which number only eight appear to be missing and unaccounted for.

The number of books in the Library by count is eight thousand three hundred and four, an increase over the number last annually reported of six hundred and seventy-four.

Since the last annual report I have received for fines and catalogues, and paid to the Treasurer, the sum of eleven dollars and fourteen cents.

Donations of Books have been received from the following persons :

HON. SAMUEL D. BELL,

HON. DANIEL CLARK, U. S. S.

HON. E. W. HARRINGTON,

WILLIAM F. GOODWIN, ESQ., Concord,

REV. S. S. HUNTING,

STEPHEN S. CLARKE, ESQ.

Jan. 4, 1862.

F. B. EATON, LIBRARIAN.

TREASURER'S REPORT.

VALLEY CEMETERY.

To his Honor the Mayor and City Council of the City of Manchester:

The Committee on the Valley Cemetery, in the discharge of their duties, have not deemed any material change in the general management of the Valley necessary.

This sacred repose for the Dead is so endeared to most of our people that it is visited so frequently and generally as to render any extended report from us superfluous. It has been our aim to keep the avenues, walks and surroundings in good condition, imparting to the whole a neat and tidy appearance. Nothing beyond this has been attempted.

The proprietors of Lots, with commendable liberality,

have in several instances erected tasteful and substantial structures, doing much to enhance the beauty and loveliness of this hallowed spot.

For the financial condition of the Valley we would refer to the report of the Treasurer of your Committee.

To your Committee has also been intrusted the care and management of the

PINE GROVE CEMETERY.

This Cemetery contains about forty acres, mostly covered with a growth of wood and timber.

In the year 1860 a survey of the grounds was made and the avenues over the whole were projected, and about 330 rods built. The remaining portion of them, 572 rods, have been constructed the past season, making a total of nearly three miles in length of avenues, the cost of which is nearly balanced by the sale of wood and timber it was found necessary to remove. Still further improvements are required to make this an attractive burial place, and we would suggest that an appropriation sufficient to inaugurate a system of gradual improvements be made.

All which is respectfully submitted:

JOSEPH KNOWLTON, CITY AUDITOR.

Jan. 28, 1862. In Board of Mayor and Aldermen,

Read and accepted,

JOSEPH KNOWLTON, CITY CLERK.

CITY SOLICITOR'S REPORT.

HILLSBOROUGH, SS. }
City of Manchester. }

To the Hon. Board of Mayor and Aldermen and Common Council.

Report of the Solicitor for year ending Jan. 1862.

At the present date there are three actions upon the Docket of the Supreme Judicial Court, in said County, viz: Underhill vs. City; Lahey vs. said City; and Dow vs. said City. The first named case was entered May Term, 1860. Judge Perley was retained in said case, but his fee was paid and his retainer ceased the first of the year 1861.

Upon the sessions Docket of said Court stands two actions or petitions, one of C. M. Hubbard and others, who Petition for a new highway, in said City. The other is a Petition of said City for discontinuance of a highway unanswered to; in all of said actions no counsel appear, except the Solicitor or his partner, and no counsel is retained at the expense of said city. A question has arisen in regard to tax of Concord Railroad, and in accordance with said Company's request, the collector has been advised to rest the matter till the Spring tax of said Company is assessed by Supreme Court, at which time they agree to get the written opinion of said Court as to their liability to pay said tax.

Another question has arisen in regard to Arthur L. Eastman's tax. And the collector has been advised that he is

liable to pay said tax, "providing the same has not been abated." I would respectfully refer the Hon. Board of Mayor and Aldermen and Common Council to the Police Record for the manner said duties have been performed, as it would be impossible to state specifically.

The expense to said City for legal aid and advice, the past year, has been one hundred dollars. And there is no claim known to me, or authorized by me, aside from that. All of which is respectfully submitted.

C. W. JOHNSON, Solicitor.

Jan. 14, 1862. In Board of Mayor and Aldermen,
Read and accepted.

JOSEPH KNOWLTON, CITY CLERK.

Jan. 14, 1862. In Board of Common Council,
Read and accepted, O. C. MOORE, CLERK.

CHIEF ENGINEER'S REPORT.

To His Honor the Mayor and Board of Aldermen :

GENTLEMEN: In compliance with the requirements of the Revised Ordinances, I herewith transmit to your Honorable Board a report of the condition of the Fire Department; also an appraisal of the property belonging to the same, the location of the several Engines and apparatus, with the force belonging to them, the location and condition of the Reservoirs, and other supplies of water within the City.

At the commencement of the year the Department consisted of two Hand-Engines, forty-five men each; two Steamers, with fourteen men each; one steamer, with twelve men; one Hose Company, with twenty men, and one Hook and Ladder Company, with twenty-five men; consisting in all of one hundred and seventy men.

The first of April one Hand-Engine, the Torrent No. 5, situated on Manchester street, was discharged from service. The force and location of the present Department is as follows: Two Steamers, the Amoskeag No. 1, the Fire-King No. 2, with fourteen men each, and the Pennacook Hose Company, with twenty men, house on Vine street; the Hook and Ladder Company, with twenty-five men, house on Manchester street, near Pine; one steamer, E. W. Harrington No. 3, with twelve men, house on Main street (Piscataquog), and one Hand-Engine, with forty-five men, house in Amoskeag Village, consisting in all of one hundred and thirty men. Torrent No. 5 Hand-Engine and

Hose-Carriage have been sold to the town of Rochester, N. H., for five hundred dollars. The A. C. Wallace No. 7 remains in the house on Chestnut street, formerly occupied by No. 4.

During the past year a twelve-inch cement pipe has been laid from the gate at the corner of Hanover and Chestnut streets to the reservoir in front of the City Hall ; also a nine-inch cement pipe from that down the back street in the rear of Merchants' Exchange to the reservoir on Manchester street near the American House, giving a supply of water sufficient for any length of time. A reservoir has been put in at the junction of Myrtle and Elm streets, holding about sixteen thousand gallons, which has by trial proved sufficient to supply one Steamer from one and a half to two hours, there being a large natural supply of water to the reservoir.

By laying a pipe from the gate at the junction of Hanover and Pine streets, down Pine street to the reservoir between Manchester and Merrimack streets, and from that to the reservoir at the junction of Central and Pine streets, the City proper would be supplied with water sufficient for any emergency, and would be available at almost any point within its limits.

At Piscataquog a tank has been put in the last year in front of the house of Samuel Webber, Esq., on Granite street, by running a line of hose from a hydrant at the Manchester Print Works across the bridge. It furnishes a good supply of water for that part of the village. By putting in a large reservoir in front of the Steamer's house, that part of the City would be well supplied with water.

At Amoskeag village the only supply, to any extent, is at the river and the Pentstock near the Batting Mill. At Bakersville, Hunt's Pond furnishes a supply sufficient for any emergency.

The Engines are in good repair, and all the apparatus belonging to the Department is in good condition, and the success of the Department the past year is the best evidence we can give of its efficiency.

Too much credit cannot be given to the members of the Fire Department for their promptness and the efficient manner in which they have discharged their duties as Firemen during the past year.

Respectfully submitted,

A. C. HEATH,
Chief Engineer.

AMOSKEAG STEAM FIRE ENGINE CO., NO. 1.

THE
SIXTEENTH ANNUAL REPORT
OF THE
SCHOOL COMMITTEE,
OF THE
CITY OF MANCHESTER,
FOR THE YEAR
1861.

CITY OF MANCHESTER.

IN SCHOOL COMMITTEE, }
Jan. 6, 1862. }

Mr. Adams, Special Committee on the Annual Report, presented the accompanying Report, which was adopted by the Committee and ordered to be presented to the City Council.

JAMES B. STRAW, CLERK.

IN BOARD OF MAYOR AND ALDERMEN, }
Jan. 6, 1862. }

The Annual Report of the School Committee was read, accepted and ordered to be printed in connection with the Annual City Reports.

JOSEPH KNOWLTON, CITY CLERK.

IN COMMON COUNCIL, }
Jan. 7, 1862. }

The Report of the School Committee, sent down from Board of Mayor and Aldermen, was read, accepted and ordered to be printed, in concurrence.

S. D. FARNSWORTH, CLERK.

REPORT.

TO HIS HONOR THE MAYOR,
AND THE CITY COUNCIL :

At the close of the year, in common with every department of the municipal government, the School Committee present to you, gentlemen of the City Government, their Annual Report, and through you, officially, communicate with the interested public, whom you and we represent.

Our duties have not been onerous nor irksome ; most of them have been recreations, mental and physical—the profitable and pleasing disposition of hours borrowed from the active pursuits of life. Our meetings have been frequent, but not tedious ; our counsels harmonious, our decisions generally unanimous, and never revoked nor materially modified.

We have intended to pursue a conservative course and have undertaken few radical reforms. We have attempted no revolutions—no ill considered and speedy reformatations, preferring to bear with trivial defects in system, and even tolerate for the time, errors not necessarily fatal, rather than risk the loss of advancement already made, or peril a labor which is producing beneficial results. We trust we have

corrected some abuses, remedied some deficiencies in government and instruction, and stimulated and encouraged both teacher and pupil to make earnest efforts for a higher position than they have before attained.

In financial matters, we have been governed by a regard to economy,—have expended little that was not demanded for the progress of our schools and for the future prosperity of the City. We have exchanged no well known teachers for those of little experience; we have ordered the introduction of no new text books, thus unnecessarily taxing the public; we have instituted no new projects and commended no new schemes, which will require larger appropriations, or increased taxation.

FINANCE.

As the finances of the department are the essential basis of our public Schools, and the management of the fiscal affairs of the several Districts more frequently discussed, and the most interesting to a large portion of our citizens, that topic shall be first presented in the report.

At the commencement of the year, the Committee found in the treasury and appropriated to the several School Districts the sum of \$1,696 48 being \$1,881 80 less than the amount in the treasury a year previous. This was credited to the several Districts as exhibited in the accompanying table.

and was increased by the addition of \$17,000 00, the same amount as was appropriated the year preceding. This was apportioned to the several Districts, according to the usual practice by the City Council. The amount granted each District will be seen in the table annexed.

Dist.	In Treasury Jan. 1, 1861.	New Appropriation.	Total.
1	\$40,89	\$200	\$240,89
2	959,90	14,000	14,959,90
3	112,58	275	387,58
4	103,26	200	303,26
5	88,20	200	288,20
6	22,04	225	247,04
7	107,97	225	332,97
8	36,18	200	236,18
9	14,09	200	214,09
10	131,97	975	1,106,97
11	79,40	500	579,40
	\$1,696,48	\$17,000	\$18,696,48

This, compared with the amount at the disposal of the Committee the year preceding, is exhibited by the annexed statement.

Dist.	1860.	1861.	Decrease.	Increase.
1	\$228,12	\$240,89		\$12,77
2	16,455,77	14,959,90	1,495,87	
3	412,91	387,58	25,33	
4	300,15	303,26		,11
5	285,08	288,20		3,12
6	216,85	247,04		30,19
7	340,62	332,97	7,65	
8	230,79	236,18		5,39
9	222,82	214,09	8,73	
10	1,245,70	1,106,97	138,73	
11	639,47	579,40	60,07	
	\$20,578,28	\$18,696,48	\$1,736,38	\$51,58

DISTRICT EXPENDITURES.

We will now present in a partially classified manner, the expenditures for the several districts :

DISTRICT NO. 1.

Amount of Funds,	-	-	-	-	\$240 89
Expended for Instruction and care of					
Rooms,	-	-	-	-	200 36
For Fuel,	-	-	-	-	13 00
For Repairs, Incidentals, &c.,	-	-	-	-	25 58=238 94
In Treasury, Jan. 1, 1862,	-	-	-	-	<u>1 95</u>

DISTRICT NO. 2.

Amount of Funds,	-	-	-	-	\$14,959 90
Expended for Teaching	-	-	-	-	12,253 22
“ “ Repairs,	-	-	-	-	411 00
“ “ Fuel,	-	-	-	-	802 91
“ “ Care of Fires,	-	-	-	-	163 87
“ “ Supplies,	-	-	-	-	77 99
“ “ Printing and Stationery,	-	-	-	-	251 90
“ “ Incidentals,	-	-	-	-	244 67=14,205 56
In Treasury, Jan. 1,	-	-	-	-	<u>\$754 34</u>
In addition, there have been expenditures					
on Repairs, to the amount of	-	-	-	-	\$1,020 57
Insurance in the sum of	-	-	-	-	216 00
Notes and Interest paid amounting to	-	-	-	-	2,710 20
					<u>\$3,946 77</u>

For which appropriations were made by District vote.

DISTRICT NO. 3.

Amount of Funds, - - - -	\$387 58
Expended for Instruction, &c., -	288 66
For Fuel, - - - - -	25 50
Miscellaneous Expenses, Repairs, &c.,	10 72=324 88
Balance in Treasury, - - - -	<u>\$62 70</u>

DISTRICT NO. 4.

Amount of Funds, - - - -	\$303 26
Expended for Instruction, &c., -	252 04
For Fuel, - - - - -	8 50
Miscellaneous Expenses, Repairs, &c.,	8 49=269 03
Balance in Treasury, - - - -	<u>\$34 23</u>

DISTRICT NO. 5.

Amount of Funds, - - - -	\$288 20
Expended for Instruction, &c., -	204 87
For Fuel, - - - - -	13 00
Miscellaneous Expenses, Repairs, &c.,	8 93=226 80
Balance in Treasury, - - - -	<u>\$61 40</u>

DISTRICT NO. 6.

Amount of Funds, - - - -	\$247 04
Expended for Instruction, &c., -	193 12
For Fuel, - - - - -	13 00
Miscellaneous Expenses, Repairs, &c.,	28 13=234 25
Balance in Treasury, - - - -	<u>\$12 79</u>

DISTRICT NO. 7.

Amount of Funds, - - -	\$332 97
Expended for Instruction, &c., -	202 87
For Fuel, - - - - -	27 60
Miscellaneous Expenses, Repairs, &c.,	20 74=251 21
Balance in Treasury, - - - -	<u>\$81 76</u>

DISTRICT NO. 8.

Amount of Funds, - - - -	\$236 18
Expended for Instruction, &c., -	178 37
Miscellaneous Expenses, Repairs, &c.,	8 00=186 37
Balance in Treasury, - - - -	<u>\$49 81</u>

DISTRICT NO. 9.

Amount of Funds, - - - -	\$214 09
Expended for Instruction, &c., -	185 87
For Fuel, - - - - -	13 00
Miscellaneous Expenses, Repairs, &c.,	11 79=210 67
Balance in Treasury, - - - -	<u>\$3 43</u>

DISTRICT NO. 10.

Amount of Funds, - - - -	\$1,106 97
Expended for Instruction, &c., -	1,158 75
For Stationery, Repairs and Incidentals,	48 54=1,207 29
Deduct Appropriation, - - -	1,106 97
Overdraft on Treasury, - - -	<u>100 32</u>

Appropriated by District vote, for Insurance and Repairs, - - - -	\$160 00
Expended for Repairs, - - - -	124 80
Leaving balance in Treasury, - - - -	<u>\$35 20</u>

[The bill for the Insurance has been approved by the Committee and lodged with the Treasurer, but the payment was made by an order given by the Mayor, on the District funds in the Treasury. The \$35,20 on hand, will cancel the claim, if any is made by the City.]

DISTRICT NO. 11.

Amount of Funds, - - - -	\$579 40
Expended for Instruction, &c. - -	511 08
For Repairs and Incidentals, - - -	24 22=535 30
	<u>\$41 10</u>

RECAPITULATION.

Dist.	Am't of Funds.	Expended.	Balance.
1.	\$240 89	\$238 94	\$1 95
2.	14,959 90	14,205 56	754 34
3.	387 58	224 88	62 70
4.	303 26	269 03	34 23
5.	288 20	226 80	61 40
6.	247 04	234 25	12 79
7.	332 97	251 21	81 76
8.	236 18	186 37	49 81
9.	214 09	200 66	3 43
10.	1,106 97	1,207 29	overdraft, 100 32
11.	579 40	535 30	44 10
	<u>\$18,896 48</u>	<u>\$17,890 29</u>	<u>\$1,106 51</u>
			Deduct overdraft in No. 10,
			100 32
			<u>\$1,006 19</u>

There are unpaid bills outstanding, amounting to \$700 or more, which will materially reduce the unexpended balances in the several School Districts, and in some instances more than exhaust the appropriations. As nearly as we can estimate, the following table will show the claims against each district, and indicate, very nearly, in "round numbers," the financial condition of the treasury after the payment.

Dist.	Unpaid Bills.	Bal. after Payment.	Deficiency.
1.	\$10 00		\$8 00
2.	500 00	\$250 00	
3.	12 00	50 00	
4.	5 00	30 00	
5.	10 00	50 00	
6.	5 00	8 00	
7.	6 00	75 00	
8.	18 00	30 00	
9.	3 00		
10.	100 00		200 00
11.	40 00	5 00	
	\$709 00	\$488 00	\$208 00
Deduct deficiencies,	-	208 00	
Balance,	-	\$280 00	

REPAIRS.

The Repairs for the year have not been extensive, the Committee not feeling authorized to expend a dollar not really demanded by the wants of the several districts. The school house in District No. 1, was thoroughly repaired last year, by vote of the District, and has, this season, required no expenditures beyond the payment of a small bill for seats previously ordered.

In the Central District, one of the heaviest bills for repairs and improvement of school rooms, has been for the partition in the Manchester street house, by which the main room in that building is divided by slides, so as to constitute two distinct apartments. The expense was by contract \$200, though an additional expense of \$75 was rendered necessary to furnish new seats for the additional room provided by the alterations. The room formerly accommodated with seats only 96 pupils. Now 120 can be seated in the double room, as comfortably as could 96 formerly. The advantage of the change can be readily seen.

Another bill of about one hundred dollars was incurred for the sinking of vaults at the North Grammar School house and the reconstruction of the outbuildings. The other expenditures for repairs in No. 2, are for new stoves and pipes to take the place of those which had become unfit for use,

the painting of the interior of several houses, and the ordinary repairs which are constantly required.

In No. 10, the sum of \$160 was raised by District vote to make repairs and pay insurance premium, which has been appropriated to the purposes designated by the vote. About \$65 was expended for new seats and desks; \$35 20 reserved for insurance, as will be seen in the financial statement, and the balance employed for other needful repairs.

In No. 11, an appropriation was made for grading the yards about the house, building a fence and supplying other wants of the district. But the money was expended by a Special Committee authorized by the district, and does not come before this Board for consideration and report.

In No. 2, an appropriation was made for insuring school houses, and the sum of \$2,500 was raised by vote for payment of notes and interest. The sum of \$216 has been paid for insurance, and \$2400 for notes and interest, by order of the Superintendent, who was authorized by the District to attend to the business. The amount due for the Blodgett street lot, (\$400) has been paid, and a note over due last year has been taken up by the Treasurer. The Park Street house has been repaired according to instructions of the District at the Annual Meeting. But as these matters come especially under District authority, we only name them here, supposing they will be reported to the people at the Annual Meeting by the proper committees.

There is during the year much wanton destruc-

tion of public property through the recklessness or malice of boys,—even by those of man's growth—sometimes by those who are members of the school, but generally by those who have never been injured by too close confinement in the school room, and to whom “a little learning is a dangerous thing.” Although a liberal reward has been offered by the Mayor for the detection of such offenders, none have yet been punished by the rigors of the law.

DISTRICTS AND SUB-DISTRICTS.

Frequent inquiry is made regarding the boundaries of the eleven School Districts of the City—and in regard to the divisions of the Central Districts with reference to the various grades of school. The former division is in the authority of the City Council, the latter is arbitrary with the Committee and varies from time to time according to the mutations of the population.

Originally, or, at least, long before many of the present inhabitants of Manchester were residents here, the town was divided into four School Districts, each of which, though embracing a large extent of territory, was small in respect to the number of its scholars, and limited in the means of supporting a school. The first was called the “Falls District,” and included the portion of the town lying

on the river north of the present location of Granite Street. The "Meeting House District," embraced Hallsville, Bakersville, and the section of the town in the vicinity of the city farm. The present districts, Nos. 6 and 9, constituted the "Calef District," and Nos. 4 and 5, and a part of 3, composed the "Harvey District."

In 1819, the Falls District was divided "between Mr. Ray's and John Stark, 4th's." Various changes were made in the other districts from time to time,—of which it is not easy to find a record,—until 1839, when there appears to have been eight districts in the town, though no official record of their creation is accessible, and it is believed none exists.

In that year a committee was appointed to fix the boundaries of the districts, but at the Annual Meeting of 1840, the matter was referred to the Selectmen, who in November following reported, recommending the organization of nine districts.

The report was accepted and the districts established with the following boundaries :

DISTRICT NO. 1.

Beginning at the north angle of the town on the bank of the Merrimack river ; thence southerly and bounding by said river to the northwest corner of John Ray's farm ; thence easterly by the north line of said Ray's farm to the northeast corner of the same ; thence on the same course to Chester original town line ; thence northerly to the southwest corner of the town of Hooksett ; thence northerly by Hooksett line to the place of beginning.

DISTRICT NO. 2.

Beginning at the northwest corner of John Ray's farm, being the southwest corner of District No. 1 : thence southerly, bounding on Merrimack river to the old ferry road near the Samuel Hall place ; thence easterly by said ferry road to land owned by David Young ; thence easterly and southerly by said Young's land to the aforesaid ferry road ; thence easterly by said road to the southeast corner of the Amoskeag Company's land ; thence northerly and easterly by said company's land to Chester original town line ; thence northerly by said Chester line to the southeast corner of District No. 1 ; thence easterly [westerly ?] by said District No. 1, to the place began at.

DISTRICT NO. 3.

Beginning at the southwest corner of District No. 2, on the bank of Merrimack river ; thence southerly, bounding on said river to the northwest corner of William P. Webster's farm, to the old river road ; thence on the same course to the line between David Webster, Jr.'s and Jonas Harvey's land ; thence northerly to the northeast corner of said David Webster's land ; thence on the same course to John G. Brown's land ; thence easterly by said Brown's land to Chester original town line ; thence northerly by said town line to David Young's land ; thence westerly by said Young's land to a point due south of the southeast corner of District No. 2 ; thence north to said corner ; thence westerly by said District No. 2, to the place began at.

DISTRICT NO. 4.

Beginning at the southwest corner of District No. 3, at Merrimack river ; thence southerly, bounding on the river to Litchfield line ; thence southeasterly by Litchfield line to the line of Londonderry ; thence northerly to the northwest corner of said Londonderry ; thence easterly on the line of said Londonderry to the southwest corner of land owned by the heirs of Nathaniel Moor, deceased ; thence northerly by the east line

of the said heirs' land and David Webster, Junior's land, to the southeast corner of District No. 3; thence westerly by said District No. 3 to the place of beginning.

DISTRICT NO. 5.

Beginning at the southeast corner of District No. 4, on the north line of Londonderry; thence easterly by Londonderry line to the Mammoth road; thence northerly by said road to Coburn's brook, and down said brook to great Cohas brook; thence across said last mentioned brook and in a direct line to the easterly corner of Israel Merrill's land, being the southwest corner of a piece of meadow, owned by Jonas Harvey; thence northerly by the east line of said Merrill's land and James McQueston's old farm, to Archibald Gamble, Junior's farm; thence westerly to the southeast corner of Isaac & John Huse's wood lot, numbered 8; thence northerly by said lot No. 8, eighty rods; thence westerly in a direct line to the northeast corner of Amos Weston Jr.'s land, lot No. 7; thence westerly by said Weston's land to Chester old line; thence southerly by said Chester line to the southwest corner of District No. 3; thence running westerly by District No. 3, and southerly by said District No. 3, and District No. 4, to the place began at.

DISTRICT NO. 6.

Beginning at the southwest corner of the town of Hooksett; thence southerly and westerly by Districts Nos. 1 and 2, to Humphrey's brook; thence up said brook to the old road leading from the town house to Amoskeag village; thence east to Chester original town line; thence northerly by said Chester line to Moses Davis' land; thence easterly and northerly by said Davis' land to the Mammoth road; thence northerly by said road to the south line of the Jeremiah Johnson place; thence easterly by said Johnson place to the southeast corner thereof; thence northerly to the southeast corner of lot No. 30; thence northerly by the east line of lots numbered thirty and one hundred and two, to Hooksett line; thence westerly by Hooksett line to the place began at.

DISTRICT NO. 7.

Beginning at the northeast corner of District No. 6, on Hooksett line; thence southerly and westerly and bounding on Districts Nos. 6 and 3, to the northwest corner of Amos Weston, Jr.'s farm; thence easterly and southerly by District No. 5, to the northeast corner of the same; thence easterly by the south line of Archibald Gamble, Jr.'s farm to the Mammoth road; thence on the same course to Samuel Gamble's land; thence northerly by Samuel Gamble and Thomas Gamble's land to the Samuel Brown farm; thence easterly by said Thomas Gamble's land to the southeast corner of Joshua Corning's farm; thence northerly by said Corning's farm, to the northeast corner thereof; thence in a direct line to the southeast corner of lot No. 21; thence northerly by the east line of lots numbered 21, 35, 37 and 46 to Hooksett line; thence westerly to the place of beginning.

DISTRICT NO. 8.

Beginning at the east shore of Massabesie pond, on the line between Israel Webster and Nathan Johnson's land; thence westerly on the line between lots to the east line of District No. 7; thence northerly by said District No. 7, to Hooksett line; thence easterly by Hooksett line to the northwest corner of Chester; thence southerly by Chester line to Massabesie pond; thence westerly and southerly by the pond shore to the place of beginning.

DISTRICT NO. 9.

Bounded northeasterly by Massabesie pond, on the east by Chester and Londonderry, on the south by Londonderry, on the west by Districts Nos. 4 and 7, and on the north by District No. 8.

In 1841, the following change was made by vote of the town:

Voted to sever from District No. 2 and annex to District

No. 3, all that part of said District No. 2, described and bounded as follows :

Beginning at the northwest corner of the Samuel Hall farm, so called, being the southwest corner of the farm formerly owned by Ezekiel Stevens, on the bank of the Merrimack, thence easterly on the line between said farms, to the east line of the Amoskeag Company's land, thence southerly by said company's land to said District No. 3, thence westerly and northerly by said District No. 3, to said Merrimack river, thence to the bound begun at.

In 1842, it was voted to annex District No. 6 to No. 2,—so that No. 2 from that date embraced all the territory included in No. 6.

In 1847, a new District to be called No. 6 was formed from Districts 7, 8 and 9, with the following boundaries :

Beginning at the west shore of the Massabesie Pond, on the line between Nathan Johnson and Kimball Hall, and running westerly on the line of lots to the northwest corner of Samuel Gamble's homestead ; thence southerly on the lots between Joshua Corning and said Samuel Gamble to the Chester road ; thence westerly on the line of lots to the northwest corner of Thomas Gamble's homestead ; thence southerly on the line between Thomas Gamble, Jonas Harvey, Jr., Samuel Gamble, James McQueston and the heirs of John Gamble to the southwest corner of Samuel Gamble's homestead ; thence easterly by said Gamble's south line to the west line of David Dickey, Jr.'s homestead ; thence easterly by said Dickey's south line to the southwest corner of the Jonathan Haselton farm, so called ; thence easterly on the south line of said Haselton's farm, on the line of lots to the southwest corner of Israel Webster's homestead ; thence easterly on the line between said Israel Webster and John G. Webster, and on the line of the lots to the west side of the town of Auburn ; thence northerly by the

west line of the town of Auburn, to the northeast corner of Thomas Goldsmith's homestead; thence westerly on said Goldsmith's homestead; thence westerly on said Goldsmith's north line to Massabesic Pond; thence westerly to the point first mentioned.

DISTRICT NO. 10

Embraces all that section of the City which was severed from the town of Bedford and annexed to Manchester. The district covers the same territory as Ward 7, and was established in 1854.

DISTRICT NO. 11

Embraces all that section of the City which was severed from the town of Goffstown and annexed to Manchester, and is now included in Ward 3. The district was established in 1854.

The changes required in these Districts, if the District system is still to be maintained, are that a portion of Wilson's Hill and the territory in the vicinity of the City Farm, now belonging to No. 7, be added to No. 2, and it may be deemed advisable to add also that portion of Hallsville, so called, which lies nearest to the Central District, as a portion of its pupils can be better accommodated at the house on the corner of Manchester and Wilson streets, than under the present organization. In this case the balance of District No. 7, with sections from Districts adjacent could conveniently be organized into a new District with the central point near the old Meeting House at Manchester Center.

As various changes of District lines have been made within the past twenty years, and many of

the persons referred to in the description and bounds have deceased or removed, it is not easy to determine the definite limits of Districts. The Committee would therefore recommend that the Districts be re-organized, with such changes as may appear to be demanded by the great increase of population in some sections of the City.

There are no sub-divisions of any Districts except Nos. 10 and 2. In No. 10, the division line for pupils of the primary and middle grades is the Piscataquog River, while the Grammar School is open to pupils from the whole District. A few pupils, qualified to attend the Grammar School, residing at a great distance, are permitted to attend the ungraded school on the south side of the river.

The High School District embraces not only District No. 2, but the whole City, though the expense of sustaining the school is met by the Central District. The same is true in regard to the Intermediate School.

The division line for the Grammar Grade, indicated on the accompanying plan by dotted lines, (· · · ·) is through Amherst and Stark streets. All pupils north of this boundary attend the Spring street School, and all south, the Franklin street School, except a few pupils residing near Wilson's Hill, who are permitted to attend the partially graded school in that vicinity.

The limits of the Middle School Grade indicated by broken lines, (-----) are for No. 1, Lowell street

on the south and Chestnut street on the west, with no boundary on the north and east, except the outer line of residences in these directions. No. 2 receives those pupils on the east of Chestnut street, between Lowell and Amherst, and those east of Pine between Amherst and Hanover. Nos. 3 and 4 receive all others of the grade east of the Middle line of Chestnut street. The three remaining Middle schools accommodate the other sections of District No. 2, Amherst and Stark streets separating those at the north from that at the south. When more than one school is in session on Blodgett street, the pupils on Prospect street and north of it, constitute Middle School No. 8.

The limits of the Primary Schools are not so well defined, being in some measure regulated by the number of pupils in the various localities. A line (—) through Vine street, and extending northerly and southerly, constitutes one general division; another through Pine street to High, then down High, half way to Chestnut, and thence midway between Pine and Chestnut to Prospect, constitute a second division. A third line extends easterly and westerly through Stark street, and between Amherst and Hanover, to Hanover Square, and another from Vine street easterly through Lowell street to Janesville, and still another through Prospect street.

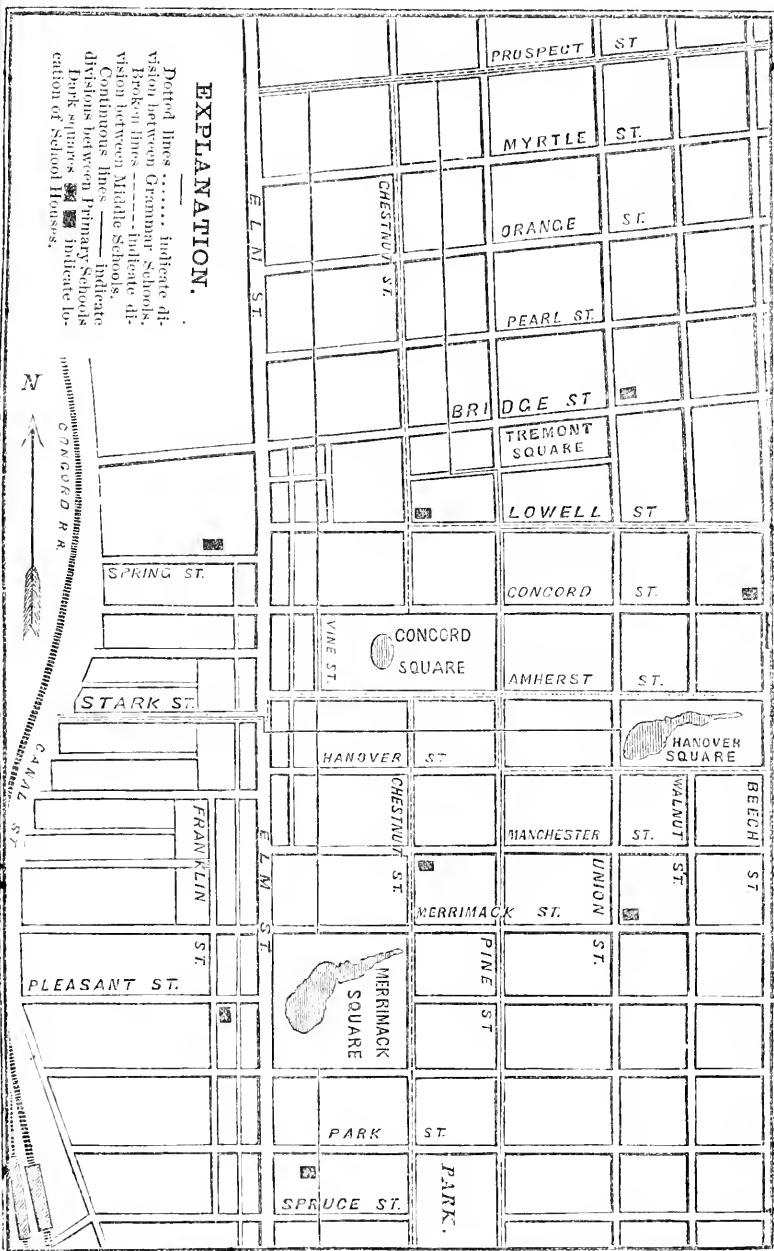

In the western section are, at the south end, Schools Nos. 7 and 8 on Franklin street, and Nos. 9 and 10 on Spring street. In the second section,

are Schools Nos. 11 and 12 at the south part, on Manchester street, and No. 1, at the north, located on Lowell street, in the High School building. In the eastern division, in the southern portion are schools Nos. 5 and 6, on Merrimack street, No. 4. on Concord street, and at the north end No. 3, on Bridge street. The school on Blodgett street, No. 14, accommodates pupils north of Prospect street; No. 2 is at Janesville, and No. 13 at the corner of Wilson and Manchester streets, in the vicinity of Wilson's Hill.

The following diagram including all the thickly settled section of the City, between Beech street and the river, embracing Prospect street on the north, and Spruce street on the south, is a correct representation of the division lines between the several schools of the district.

EXPLANATION.

Dotted lines indicate division between Grammar Schools.
 Broken lines ----- indicate division between Middle Schools.
 Continuous lines ——— indicate divisions between Primary Schools.
 Park squares  indicate location of School Houses.

EXAMINATIONS AND ELECTIONS.

The laws of the State make it the "duty of the School Committee to examine every person proposing to teach any District School" in the town over whose school interests they are to watch. The language of the statute is, "No person shall be employed as a school-master unless he is a citizen of the United States, and shall produce a certificate from the *Superintending School Committee* of the town where such school is to be kept; that he is *well* qualified to instruct youth in the various branches required to be taught in an English school in this State, and produce satisfactory evidence of his good moral character."

The Committee and Superintendent have examined about seventy new candidates for schools, who have manifested various degrees of merit, but have generally been unsuccessful in securing the object of their wishes; in some instances on account of inadequate qualifications, but generally because the supply was much greater than the demand.

The accompanying list contains the names of the teachers employed the past year, with the grade of schools in their charge, and the rate of compensation paid for the school year of forty weeks.

Teachers.	Grade of School.	Salary.
John P. Newell,	High,	\$1100

TEXT BOOKS.

In former years the public has sometimes been indignant with committees for the frequent changes of books. It has been an evil, not only in our own schools, but is one of common occurrence throughout the country. Interested publishers send out their agents, who are directed to use *argument* of the most convincing kind, and to introduce their books at some rate, though they be obliged to give them. There is an inducement to change because they will cost nothing. Teachers are often anxious for a new book — it has novelty in it, and is a relief to them from the common monotony of daily requirements, and they urge its adoption. Committees, trusting to their practical judgment, are apt to yield.

No such charge can be laid to us. We have ordered out no book, and suffered no new one to be

introduced. We have seen agents, have been importuned, have heard arguments, have had liberal offers for the exchange of books, but have escaped annoyance by the proper use of the simple monosyllable, "*No.*"

We are not committed to old books without possibility of change. Change is sometimes demanded, but it is better to suffer some inconveniences rather than work greater evils. No school book should be adopted as a standard until it has been practically tested by an intelligent class under the direction of a discriminating teacher. This practice will prevent the inconsiderate introduction of books and save the public needless expense.

And here we take the liberty of making a suggestion for the consideration of the people of the State, for which we shall be pardoned and even commended by those who appreciate the evil we condemn, though the subject does not come within the prescribed limits of our local authority. The Legislature should authorize the Board of Education or a special committee to examine and select a series of text books, for the use of common schools throughout the State, which being introduced, should not be changed for a term of years. The advantages would be a saving of the expense imposed upon families by the purchase of new books, except when demanded by the promotion of pupils; it would relieve teachers and committees from the annoyance of importunate agents, and would secure a unifor-

mity of books and a better classification in all the towns of the State.

The value of books furnished for poor children during the year is much less than was anticipated eight or ten months ago. The full amount up to the first of December was only about \$40. During the present month, in consequence of the advancement of classes to higher grades, there has been a large increase over any previous month. The bills for the recent supply will be not far from \$30. They have been furnished under the direction of the Superintendent, who has a record of all that he has delivered personally, and has the names of those who have received orders for them. The teachers have been required to investigate all cases in which application has first been made to them for aid.

DISCIPLINE, TRUANCY AND TARDINESS.

During the early part of the year the Committee were called on to perform several unpleasant acts of duty, in consequence of a disaffection in several districts. More complaints were made during two months of last winter than often occurs in as many years. In one instance a teacher resigned, without

a contest ; another, acting on the advice of friends, after a hearing, offered his resignation, and in another case, after a thorough investigation the teacher was sustained and retained in the school room. Other complaints were made but did not receive the official action of the Board.

There has been more than the usual amount of out door excitement the past year, and it has been difficult to exclude its influence from the school room. Boys, and sometimes girls, very naturally have been induced by the march of the soldier, and the music which adds a charm to the soldier's life, to leave the required round of daily study and join the multitudes that have thronged the street ; or they sought and too often obtained parental permission to visit the camp or follow the music.

The truant officer has made many reprimands and a few arrests. The number of truant children which, during the year, have been found in the streets, is over two hundred, some of whom have been frequently reprov'd. A few have been afforded a permanent school and home in the excellent institution at the north end of the City, a few have been punished by fine, while the greater number have been persuaded to return to school. Often the fault is at home. Poverty sometimes induces the parent to keep the child from school. Pride asserts its office and transcends its rightful duty, and the child suffers through life the loss of early training.

Tardiness is another evil which requires attention. There is but a small number of scholars who are always punctual. With some, tardiness becomes a habit, as punctuality does with others. Even teachers sometimes forget that they are required to be in their school rooms before the precise time for commencing the school exercises. The delinquencies should be corrected without delay.

ANNUAL FESTIVAL.

The School Festival inaugurated last year has the present year re-established itself in the confidence of the public and given strong testimony in favor of the continuation of vocal music in our common schools. After a year's labor we begin to see the beneficial results. It has been demonstrated that even our youngest pupils can learn vocal music, and it has been made more evident that nearly every pupil in the higher grades of schools can become a fair singer. The execution of some pieces of difficult music by the young ladies of the Grammar and High Schools was warmly commended by those who appreciate the art of vocal music.

The advancement of a single year will be perceived in some degree by a contrast of the charac-

ter of the singing, the first of this term, with that at the close of the last. The removal to a higher grade of a fourth or third of a school leaves a void in the musical exercises quite as marked as that in any other branch.

There can be no doubt in regard to the expediency of continuing the instruction in this branch in our public schools. We must not expect to see perfection. We ought to anticipate but little, for a teacher cannot accomplish a great work without constant practice and ample time. He can now give only half an hour a week to each school. But with a continuation of proficiency as marked as that which has characterized the efforts of last year, we shall eventually find a class of young singers which can be excelled in but few cities in New England.

There are other topics which might with propriety be considered in this report. We might discharge an important duty in advocating the construction of more commodious school rooms in many localities of the city; we might recommend improvements in the school system, and suggest plans for future reforms; we might advocate a deeper interest on the part of the people in common school education; we might consider the moral and physical, as well as the intellectual training of the young; we might discuss the plans to be adopted to reduce the expenditures of the department, and introduce

other important matters for public consideration, had we not already extended our report beyond ordinary limits.

Inviting the attention of the City Government and the public to the report of the Superintendent, which is presented in this connection, we close our account of the administration of the educational affairs of the City, and congratulate ourselves with the assurance that our labors have been acceptable, inasmuch as the electors of the City have decided that the Board for the ensuing year shall consist of the members of the old Board, with the single exception that a new man takes the place of one of our number who holds another responsible and honorable relation to our public schools.

H. R. CHAMBERLIN, TREASURER.

Manchester, Dec. 31, 1861.

SEVENTH ANNUAL REPORT

OF THE

SUPERINTENDENT OF PUBLIC INSTRUCTION,

FOR THE YEAR 1861.

IN SCHOOL COMMITTEE, }
Jan. 6, 1862. }

Read, accepted and ordered to be presented to the City Council, in connection with the Report of this Board.

JAMES B. STRAW, CLERK.

IN BOARD OF MAYOR AND ALDERMEN, }
Jan. 6, 1862. }

Read, accepted and ordered to be printed.

JOSEPH KNOWLTON, CITY CLERK.

IN COMMON COUNCIL, }
Jan. 7, 1862. }

Read, accepted and ordered to be printed in concurrence.

S. D. FARNSWORTH, CLERK COMMON COUNCIL.

REPORT.

TO THE SCHOOL COMMITTEE :

It is now ten years since my first official connection with the public schools of Manchester. Within that period I have marked the frequent changes in the educational department of the city, and the constant onward progress which has been measured, from time to time, in our published reports and in our annual examinations. I have seen the number of schools increase from thirty-one with thirty-six teachers to thirty-nine with over fifty teachers. The pupils, then numbering twenty-three hundred, have increased to nearly four thousand. Instead of thirty-six school and recitation rooms, with eighteen hundred seats, we now have about sixty rooms with seats for three thousand pupils.

Within the period named we have built ten new school houses containing thirty rooms, and over twelve hundred seats. No systematic and effectual ventilation existed at that date, while now all our new and large houses and many of the old and small ones are provided with ample means of ventilation. Many of our school houses have been reconstructed, made more convenient for occupation, provided with superior furniture, and supplied

with apparatus, maps, charts, and blackboards to a very liberal extent. The amount of money appropriated for the year 1852, was but a fraction over \$8000,—now our expenditures, aside from those ordered by district vote for the purchase of lands and the construction and repair of houses, are more than double that amount.

These statistics afford convincing evidence of our material growth and prosperity; we have been adding to our resources and extending our educational facilities; we have enlarged our field of action and brought an increased degree of energy into service; we have adorned our city with beautiful edifices and constituted them durable monuments to commemorate the love of our people for the Common School System. We have made intellectual advancement, no less marked and gratifying than our physical and material growth. Our schools have slowly but constantly progressed from year to year; our people have manifested renewed interest in them, which has exerted a beneficial influence on the pupils; our teachers have become more rigid and systematic in their discipline, and far more thorough and critical in their instruction. An influence has originated in our schools and their official management, which has been felt in other communities and given our school department an honorable name beyond the limits of our own state. The liberal compensation paid to teachers induces those who are well qualified to seek employment here, and the determination on the part of the school au-

thorities to employ none but competent instructors is a good recommendation of those who are retained through the changes of years.

Manchester teachers are sought for higher and more lucrative places and are often taken on the mere commendation of those who have had the superintendence of our public schools. To-day, many teachers, both gentlemen and ladies, who have labored faithfully and whom we unwillingly gave up, are doing valuable service in the highest positions of educational labor.

Although we have been compelled to accept the resignations of many valuable instructors in our public schools for the various positions which have laid claim to them, we believe there has never been a time when *all* the teachers were so well qualified for their positions—when all were so faithful in the discharge of their duties and were so acceptable to the people, as during the past few terms. With the exception of several cases in the rural sections of the city during the past winter, and an occasional instance in the central districts, which will be noticed in the proper place, there has been but little expressed dissatisfaction and but little occasion for fault finding, except to such as prefer to speak evil rather than good.

That I may present to you and the public a more definite knowledge of the character and condition of the several schools under my official supervision, I choose to consider each by itself and to judge it by its merits. I shall endeavor to give all a proper

consideration, keeping in view the facilities which all have possessed and the influences which have operated upon them. I do not design to condemn them merely because they are not in all respects what we should be glad to see them, but to present them as they are, with the circumstances that influence their character, and let them stand or fall, in public estimation as they deserve.

UNGRADED SCHOOLS.

The number of schools which from their location cannot well be graded is *eight*—located in the eight suburban districts on the east side of the Merrimack. But two or three of these are ever large ; some being too small in respect to numbers to possess that interest, that ambitious rivalry which should exist between pupils, in order to lead them to industrious and persevering habits of study. This class of schools is difficult of management ; not that the members are of themselves incorrigible or particularly impatient of restraint,—nor that the teachers are wholly in fault, but the circumstances which surround them produce almost inevitably and without the possibility of prevention, difficulties which can not be overcome. The best schools are not always where the best teacher instructs nor where the best pupils learn, but where there is union of feeling among the people—where there are no sectional animosities and no local feuds.

NUMBER I. In this District, the reports for years past show that the people have been very unfortunate in the selection of teachers made for them by the School Committee, or that the teachers have been unfortunate in being placed in such a community. There has been little else than complaints from a portion of the District, summer and winter, with rare exceptions for several years past. It has made but little difference whether the teacher had a good professional reputation or none, whether he had long years of experience or was fresh from academic studies, the result was too often the same—a failure to please, and eventually a failure to be useful. There was a mutual disaffection. The parents disliked the teacher and the teacher soon became unpopular with the pupils, and naturally entertained no very friendly regard for either. A year ago, however, the people fortunately discovered that the fault was attributable to the wretched old school-house which for a series of years they had compelled their children to occupy. Like honest men they resolved to remedy the evil. They called a school meeting, raised \$150, thoroughly repaired and refurnished the house, entirely transforming its interior appearance, and making it respectable and comfortable. Since the accomplishment of that commendable act, no District has been more successful in the assignment of teachers or better satisfied with the progress of the children in their various studies. Under the direction of the teachers of the past year, the school though small,

and wanting in that animation which should characterize it, has made good progress and sustained good order and merited a good name.

NUMBER III. The same difficulty as formerly existed in No. 1, meets us at the threshold in No. 3, and the people of the District will be rewarded by the improved character of their school, whenever they shall have sufficient harmony of feeling and concert of action to resolve on the construction of a new house. The present remnant of a building has been moved about and repaired repeatedly since my first acquaintance with it, and at that time it was regarded as entirely unfit for use. It has uncomfortable seats for forty pupils, but in prosperous times in the mechanical interests of that locality, sixty or seventy scholars are compressed into the space designed for two-thirds of the number.

During the winter the teacher was acceptable to a majority of the District, though a few citizens complained of too great severity, while others accused him of too much leniency. The school always maintained good order, and gave evidence of as much advancement as it has under other well approved and popular teachers.

In the summer and autumn the school was very large, requiring a great amount of mental and physical labor, which the teacher had no inclination to withhold. We have but few more accurate or faithful teachers.

NUMBER IV. Here we have had no difficulty in the school for several years. If the teacher is not perfect, the people have the good sense to make the best of it, and as a consequence we see one of the pleasantest schools in the city, and meet the most cheerful faces that ever gladdened a school room.

The winter school was of a superior character, taught by a plain, unpretending man, whose whole aim and interest were to benefit his pupils. The summer and autumn school was generally regarded with satisfaction. The teacher was not very rigid in her discipline, but gave good instruction, and most of the pupils afforded evidence of proper attention to their duty.

NUMBER V. As I had occasion to remark last year, the school in this District was favorably regarded by the people. The only deficiency observable was a want of strict discipline. The teacher was too merciful. He instructed well and merited the respect of his pupils.

The school for the two succeeding terms was small and destitute of that earnestness which we find in the best institutions. The teacher labored with a devotion worthy of a larger field of instruction.

The school-house in this District deserves to be abated as a public—*deformity*. It is a mere skeleton, through which the winds shriek and snow-flakes fly, and would be entirely unsuitable, without immediate and extensive repairs, even for an *ice-house*!

If the people of the District do not soon resolve on a better house, it will be the duty of the Mayor and Aldermen, as an act of humanity to the children, to order the erection of a new one, and assess the voters of the District to meet the expense.

NUMBER VI. An unfinished and unfinishable house stands as a monument in this District. Cold, cheerless and desolate as it is, the boys and girls succeed in obtaining a good knowledge of the text-books beneath its roof. They literally are in the "pursuit of knowledge under difficulties." The winter school was commenced by a young man of no experience as an instructor,—a scholar of high standing, a gentleman of manly and courteous bearing, but wanting in the faculty of governing, and not sufficiently familiar with the art of teaching to impart instruction with facility. At the expiration of seven weeks he resigned, and was succeeded by a teacher of practical experience, whose influence on the school was at once perceptible, and whose instructions proved satisfactory.

The summer term was taught by a young lady who had taught but little previously, who by her kind yet dignified manner won the esteem of the pupils, and though not always sufficiently exacting in her demands, was regarded with favor by most of the parents in the District.

NUMBER VII. The dissatisfaction originating in No. 6, seemed to be contagious and was soon communicated to No. 7. There was evidently some

cause for complaint prior to the publicity of the opposition to the teacher in the former District, but when that was settled by resignation, hostilities were openly commenced in No. 7. A petition was presented for the removal of the teacher, on the charge of severity in punishments. The whole matter was carefully investigated, and the committee came to the conclusion that the teacher had been imprudent and even severe in his corrections of some pupils, but that the interests of the school required that he should be retained through the term.

His successor was a teacher selected by the voters of the District, and elected by the School Committee on the general and almost unanimous petition of the District. The teacher labored diligently and with a great desire to benefit the children, but she lacked order and disciplinary power and failed to exert a beneficial influence on the school.

NUMBER VIII. Here again was a failure in the winter school. A teacher of fine education and a genial disposition, willing to make any sacrifice to gain a success, utterly failed in his ability to govern, and after eight weeks of ineffectual effort, though aided and encouraged by the committee, he determined to leave the school.

For the next term, a young lady of superior education, strong mind and of much physical energy was selected. But through want of adaptation to her position, she failed to satisfy the people, or the

committee, and her place was filled in the autumn term by a recent graduate of the High School, who, though inexperienced, succeeded well, giving good instruction and maintaining excellent order.

NUMBER IX. For several years, since the completion of a new house in this District, the school has been advancing. Winter and summer the children have had excellent instruction and have made excellent improvement of the facilities afforded them. No teachers succeeded better than those employed in No. 9.

PRIMARY SCHOOLS.

There are sixteen schools of the primary grade in the city, which contain about 800 pupils, and enroll during the year not far from 1500 names. It is understood that children may be admitted to these schools at the age of four years, though many parents, more prudent than Legislatures, withhold their children from the restraints of the school room until they can better endure the confinement demanded of them, and are better prepared by age and strength to commence a course of instruction.

NUMBER ONE. This school, located in the High School building, has been entirely changed in its character within a few years. It has a more tidy

class of pupils and those more nearly of the same age and size. Formerly there was a number of girls and boys, who were advanced in years beyond the age of primary pupils, attending this school a portion of the time, but who were compelled to labor in the mills, or spend a large portion of the year in some kind of toil to aid their parents in obtaining a daily support. These have now advanced to higher grades, or sought instruction in private schools, or have completed all the education they will be likely to obtain from printed books.

The deportment of the pupils is correct and the efforts of the teacher for their advancement worthy of commendation.

NUMBER TWO. This school has usually been regarded as ungraded, having pupils of the primary and middle grades. A year ago it had so changed from time to time, as to become distinctively primary. Since that time it has been classified with that grade, though it has usually one class of middle grade pupils. It is discreetly managed, subject to no eccentricities in government or instruction, and, making no pretence to superiority, is one of the best of its grade. It has been under the direction of the present teacher for about ten years.

NUMBER THREE. This is a large school, composed of small pupils.³ The stranger, accustomed to perfect system and mechanical exactness, might criticise the deportment of the pupils and condemn the practice of the teacher. But to us who know the

genial influence she throws about the young flock that gathers around her; to us who know how watchful she is of every child placed under her care, and how cautious that no evil find a lodgment in the heart, that school room seems a *home*, where all a mother's kindness and solicitude, patience and calmness, are united to control the young mind and direct it aright. There may not be such perfect discipline, such arbitrary government as in other school rooms. There may not possibly be so much study—there may be, through excessive charity, too much prompting before the mind can be called into action, but if so, these defects are counterbalanced by the perfect example and the manifold lessons of goodness which are daily and always placed before the school.

NUMBER FOUR. This school is marked by no peculiarities. It is not large nor difficult of management, yet the teacher finds sufficient employment in conducting it in a manner to give satisfaction to the parents who are immediately interested.

NUMBER FIVE. At the expiration of the winter term, the teacher of this school closed a long and useful connection with the public schools of this city, and since the commencement of the present term has closed her labors on earth. She was for nearly twenty years a faithful instructor in our city, and had previously had years of practical knowledge of her professional duties in other places. She yet

lives in the grateful remembrance of hundreds now in active life, and her name will be honored while the children of the present generation shall remain.

The school is composed of alphabet and primer classes, is generally very large and requires inexhaustible patience, and more wisdom and prudence than are often found even in learned heads. The present teacher has sufficient perseverance and energy, and I trust adequate judgment, to train the pupils in her charge judiciously. She may be wanting now in some of those excellent qualifications which a few years' experience will give her, and which she will not be slow to learn.

NUMBER SIX. This school is the counterpart of No. 5, and is composed of a class of scholars slightly advanced, but not prepared for admission to the middle school. It is under the direction of one of our best teachers, accurate, faithful and ready to do whatever is required of her by the school authorities.

NUMBERS SEVEN AND EIGHT. Two good schools that require but little improvement. The children are well trained at home and consequently are easily managed in the school room. The teachers have had several years' experience in their profession and have not been neglectful of opportunities to learn, nor indolent in making a right application of their knowledge.

NUMBER NINE. The teacher of this school resigned at the close of the summer term, much to the regret of the pupils and all who felt a special interest in behalf of its prosperity. She had been in it for about two years and had managed with prudence. Her successor was appointed to the place because she had labored faithfully and successfully in another school, and if industry and entire devotion to the good of her pupils will accomplish her object, she will be successful. The school is large, and somewhat irregular in its attendance ; but, with watchfulness on the part of the teacher, it is not difficult to be controlled.

NUMBER TEN. This school and No. 3 have sometimes unconsciously been rivals. They have often reported equal numbers, promoted to higher grades classes equally large, and in the general management are not very different. Here is the same kind influence as in the former, and the same easy, home-like manner of controlling the pupil. Yet there is a difference in the teachers—almost an opposition ; at least a strong contrast. Both are superior—each in her own way.

NUMBER ELEVEN. This school is formed on the same basis as No. 5,—is in fact an infant school, and generally has the proper number of children on its register to render it easy of government and pleasant in respect to its classes. During the winter terms, this and its complement, No. 12, have usually been placed under the direction of one teacher.

NUMBER TWELVE has not been for some years a school of marked characteristics. It has been sluggish, and oftentimes has seemed to be making but little progress. This has not been attributable wholly to the teachers, but partly to the disposition of the pupils. Possibly, the frequent changes occasioned by suspensions and transfers of teachers have had an influence. A new teacher took charge of it two terms ago—one who had succeeded in other places, but through her own fault, or that of the pupils, she was not entirely successful. The school was united with No. 11, for the winter term, to be re-organized whenever there shall be a demand for it.

NUMBER THIRTEEN has increased year by year, until it ranks among the largest of the primary grade. The pupils are obedient, attentive and intelligent, and the teacher's highest ambition is to prepare them for promotion, and to maintain good order.

NUMBER FOURTEEN. This school, a portion of this year, has had two classes of middle school pupils. It requires constant action and unceasing watchfulness, to be kept in a satisfactory condition. The teacher is unsparing in her labors for success, never neglects a duty because it requires effort, and is doing a good work with her classes.

NUMBER FIFTEEN. The primary school in District No. 10 is composed of very young children, who are restless, and almost unrestrainable. They have been allowed liberties which they will not willingly

surrender. They whisper, move about, and sometimes speak aloud, and give the teacher unlimited trouble in controlling them. The school has seldom, if ever, been brought under rigid discipline, and as the pupils pass up to higher grades, they are compelled to suffer shame or punishment for acts which should have been corrected in the primary school. The present teacher expends energy and words enough to command obedience. She is anxious that the pupils learn, desirous of success—but she fails to maintain that order which should be established in every school before advancement is made in the studies.

NUMBER SIXTEEN. The Amoskeag primary, after entering the new room provided for its accommodation, made marked improvement. It became more quiet and orderly, and began to manifest more mental activity. A new teacher was placed in the school at the opening of the autumn term, who found it more difficult to preserve order, and the pupils, during the twelve weeks which the school continued, made but little advancement. The present term, however, it is smaller, the teacher more decided, and order is re-established.

MIDDLE SCHOOLS.

When all the middle schools are in session, nine teachers are employed, and as a class, they occupy a very commendable position in their profession.

Though not perfect in their qualifications, nor models in all respects, they possess aptness to teach, energy to govern, and discretion in the general management of their schools. While it is possible that in some instances, the schools might be benefited by a change of instructors, the danger would be that they might be injured by the adoption of new plans and the introduction of new methods of instruction, which will, for the time, retard rather than promote the progress of the schools. In referring to them specifically, I cannot well avoid the use of language which has already been applied to them in other reports.

NUMBER ONE is under the continued care of one of the most faithful of our teachers, and is worthy of the commendation which every visitor gives it.

NUMBER TWO is a small, but good school, with attentive and obedient pupils, and a teacher of great energy and resolution. She has no disposition to avoid the responsibility which rests on her, and never complains of having too much to do.

NUMBERS THREE AND FOUR are pleasantly located, with teachers of long experience, and pupils generally disposed to learn. There have been a few scholars connected with them the past year, who would not be injured by more rigid restraint, while the general character of the schools would be improved by their reformation.

NUMBER FIVE, as usual, ranks among the best of its class, and sends up to the Grammar schools

a greater proportion of pupils well prepared, in all the required studies, for admission, than any other.

NUMBER SIX. Here is generally more oral instruction—more general information communicated than in many other schools, while the pupils in the prescribed course do not fall behind their classes when advanced to higher grades.

NUMBER SEVEN has been taught by the same teacher for about eight years, and in deportment and habits of study has always merited especial commendation. In its order and scholarship it has no superior; and, indeed, no equal.

NUMBER EIGHT has been in session only one term during the year. It was then under the charge of the present teacher of the Amoskeag primary. It made good progress, and was always in good condition. On account of the small number of pupils, it was discontinued, temporarily, and the pupils transferred to the primary in the same building.

NUMBER NINE. In Piscataquog, a middle school was instituted late in the autumn term, to relieve the primary of its surplus pupils, and to accommodate the younger pupils in the grammar department. It has not been in operation long enough for us to judge accurately of its usefulness.

PISCATAQUOG MIDDLE AND PRIMARY SCHOOL.

On the South side of the River, in District No. 10, the partially graded school, embracing primary and

middle, and sometimes a few grammar pupils, has been large, requiring great industry and energy to discharge properly all the duties demanded of the position of teacher. There are many classes, and there cannot well be less. In most of the studies, particularly in geography and reading, the school has given evidence of unusual advancement.

GRAMMAR SCHOOLS.

PISCATAQUOG GRAMMAR SCHOOL.

The higher grade school in Ward seven has now attained a position which entitles it legitimately to be classed in the grammar grade. There is not a school in the city, which, within the space of two or three years, has made better progress, or given better evidence of having been diligent in study on the part of the pupils or of having received better care on the part of the teachers.

AMOSKEAG GRAMMAR SCHOOL.

This Grammar School is very similar to that of the same grade at Piscataquog. Making all due allowance for the frequent change of teachers, this school has rapidly advanced and now numbers among its members some superior scholars. All the pupils, however, have not acquired habits of study, nor, indeed, have all learned that order is the first law of the school room. The teacher during the winter term was manly, firm and faithful. He

trained the pupils rigidly in deportment and in study, and his successor labored to maintain the position which the school had already gained.

WILSON'S HILL SCHOOL.

The school at Wilson's Hill is really a Grammar School, though usually registering a class of middle grade pupils. It is open to little complaint. In most of the branches the pupils do well, make respectable progress, and are always ambitious. Sometimes the deportment is not entirely acceptable, yet the teacher desires regularity in her pupils, and usually succeeds in enforcing discipline.

THE INTERMEDIATE.

This school never enrolled so large a number of pupils as during the first term of the present year. The rooms, designed only for ninety-six pupils, were crowded with one hundred and twenty. A new room was temporarily occupied and a third teacher employed. The elements which composed the school were varied, and were reduced to order only by the stern commands of the teachers and the school authorities. Many who had not attended school for months before, deprived of labor, sought the opportunity to review their studies. Others, who had been troublesome in middle and ungraded schools, were placed here for the severer discipline which they would receive, while not a few disaffected with the Grammar schools gained admission. The result was injurious to good order and almost fatal to real progress.

The next term the character of the school was entirely changed. The teachers were relieved from their anxiety, the pupils were quiet and obedient, and the course of instruction moved on prosperously.

On the opening of the Autumn term new instructors—both females—were elected to the school, the principal and assistant having both resigned—the former for a more lucrative position in another State. This term was characterized by good order, and the progress of the school was quite as marked as during previous sessions.

The present term, a teacher of long experience and of former success is the principal, and time will be required to show whether we have gained or lost by the changes of the year.

NORTH AND SOUTH GRAMMAR SCHOOLS.

These Grammar Schools have suffered but little general change during the year. The North School for two years has been improving in its deportment and now sustains a high position, both in respect to the order and the character of the instruction. We seldom see more devoted or correct instructors than in this school. The principal is exacting in his demands upon the pupils at the hour of recitation, and seldom fails to require the most critical accuracy of his classes. I have sometimes feared that he was too nice in his definitions, and too particular in his methods of explanation. But when the tendency of the pupil is to fall short of the ordinary requirements, his deficiencies may be counterbalanced by the extra demands of the teacher.

In the South School a new principal took charge at the commencement of the Spring term, and though preceded by a superior disciplinarian and a successful instructor, he fully sustains the character of the school, and devotes his energies to its prosperity. The number of pupils the present term is somewhat greater than in the corresponding season of last year.

In both schools the assistant teachers are well qualified to give the instruction required, and most of them discharge their duties faithfully. There is an inclination sometimes manifested in assistant teachers to avoid responsibility—to feel that they have done all that is expected of them, when they have completed the prescribed round of duties. They seldom consult with the principal, they never offer assistance to pupils out of their own division, their interest in the school is limited to their own classes, and does not always extend to every pupil placed under their instruction. I should be glad to say that there is not one of this description now employed in our public schools.

HIGH SCHOOL.

The High School has received modifications year by year, until we are satisfied that the general system or arrangement will not be much improved under the present facilities. New influences—different agencies, might produce new and more gratifying

results. A new and more commodious house would facilitate the management of the school—would allow better classification, and materially aid in promoting good order.

Now we have an average attendance of one hundred and twenty pupils, with a regular attendance during some terms of one hundred and forty. This winter we have one hundred and fifty-four members, forty-six of whom are compelled to occupy chairs, or seats without desks, and to study as they best can, because the whole number of seats in the school room is but one hundred and eight. A portion are deprived of instruction in penmanship and labor under great difficulties in respect to their other studies.

Although there are defects in this school, imperfections in teachers, and delinquencies on the part of pupils, we cannot condemn without qualification, indeed we hesitate even to reprove, while the school is struggling against so many obstacles to success. Yet notwithstanding all these hindrances, and the inexcusable negligence of some pupils, we find in the High School a good degree of merit, excellent scholars, in the languages, in mathematics, in the natural sciences and in every branch of study. We find talent here, which is manifested at every examination and on every public occasion in which members of the school are called upon to act a part.

There has been a change of one assistant, in consequence of a resignation. The substitute is without much experience in the instruction of advanced

classes, but possesses adequate scholarship and has sufficient energy to become successful.

The first assistant, during the two years of her connection with the school, has been unceasing in her efforts, and has commanded the highest respect of her pupils, and the fullest confidence of the public.

PROGRESS IN THE STUDIES.

READING is of primary importance, not only to public men, but even to ordinary business people, and the daily laborer. It is the basis of all other knowledge, for without it no progress can be made in art or science, no accurate information can be obtained of passing events beyond our own immediate field of observation.

It is essential that the basis of good reading be laid in the primary school. A good reader in the primary will read correctly elsewhere. Knowing well the sentence or paragraph he is to read, he will understand its meaning, and when called on to perform any task in other branches, will readily comprehend its bearing and consequently be prepared to master the work more readily and with less labor.

Compared with the pupils of ordinary public schools, our scholars are good readers—they have been trained with reference to enunciation, proper articulation, accentuation and naturalness of tone and style. Yet there are not many *perfect* readers. There is too much monotony in many schools, too

much mechanical action, too great formality, and no living agency, no effective, working spirit.

There is apt to be too little care in the preparation of a reading exercise. The difficult words are not studied—their meaning, and consequently the import of sentences in which they perform an essential office, is not comprehended. Pupils are too often hurried over the lesson without explanation or analysis. They are *told* but not *shown* how to read. They are conscious of defects, but are troubled to learn how to remedy them, and sometimes teachers are too indolent or too ignorant to teach them.

In SPELLING we notice great deficiency—especially when the pupils are called upon to write sentences. They may spell an assigned lesson from the book, but when they are required to write, they show their deficiency. Common words are more frequently spelled incorrectly than those which are more difficult, from the fact that they are less carefully studied. The rules of orthography, so far as practicable, should be explained and illustrated by our teachers. Spelling is made a daily exercise in all our schools, and is generally so conducted as to be beneficial to the pupils. Yet the results are not satisfactory when a practical exercise of their knowledge is required. The only proper method of making improvement in spelling is to assign to the pupil definite lessons daily in the Speller or Dictionary, and require them to be made as much a matter of careful study as any other text book.

The slate or blank book should be used by all pupils who can write, and the written exercises should be examined by the teacher or by pupils whom he may appoint. It is a good practice for the teacher to pronounce words from the reading lesson. It will test the pupils' habit of attention—their power of perception, and lead to a more careful observation of the formation of words, and the correct impression made on the mind will be permanently retained.

MATHEMATICS receive a greater amount of the pupils' attention than other studies. Oral arithmetic is taught to the child when he first enters the primary school, and this is followed by the intellectual and written work through the whole course to the High School, where arithmetic is reviewed and the higher mathematics substituted in its place. We have good mathematical scholars—they are taught thoroughly and accurately, are required to go behind rules and formulas and give the reason of processes—the basis on which rest the great principles of mathematical demonstration. We find it almost universally the case that pupils coming into the city from other places are proportionately more advanced in geography and other branches of study than in arithmetic. It is so in most of our private schools. Every comparison with other schools shows that we are affording our children superior facilities for a mathematical education.

GEOGRAPHY and HISTORY should, so far as practicable, be taught in connection. The history, as well

as topography, of a country, a river, a mountain, should be learned by the pupil. In our schools we find a fair knowledge of the former, but great deficiencies in respect to the latter. There has been a disposition to undervalue the study of history, probably without design or even a knowledge of the fact. The Committee interdicted the study in the middle schools two years ago, and teachers in the grammar schools have felt too little interest in its study, or have found sufficient employment for their pupils in the other studies of the prescribed course. They complain of the text-book, children catch the infection, and complain more loudly, and the result is, though they go over the required course, they do it without a love for it—merely because they are required to do it.

GRAMMAR has been receiving more than usual attention for a few years past. There has been an improvement in this department. We have better scholars and better instruction, notwithstanding the prominent fact that we have really no satisfactory text-book for a guide to advanced pupils, or even to those who have proceeded beyond the elements.

In the Grammar Schools, and in a few of the mixed schools, proper attention is given daily by the teachers to the art of WRITING. But in others it is treated too much as reading is, in a careless way, the exercises being hurried over and the time devoted to that branch worse than wasted. The attention of teachers is often called to the matter, but

in those schools where frequent changes occur it is difficult to enforce the requirements, in every particular, in season to be useful.

In the Middle Schools writing is excluded, or rather it is not required by the rules of the Board. I would suggest a change in this regard and require that it be made at least an occasional exercise for the higher class of pupils.

MUSIC. In this branch there has been an onward progress in every department of the public schools, and no where more marked than in the middle grade.

These pupils have had systematic training week by week, and in addition to the lessons given by the teacher of music, have had some practice under the direction of their respective teachers. They began to exercise the voice at the right age for perfect development, and the result is already perceptible. When a few more years have added to their practice and experience, these pupils then in the grammar and high schools will show the real benefit resulting from the course of musical instruction.

The following argument in favor of vocal music in our primary and middle schools, is furnished by a gentleman who has made the instruction of children a study, and is worthy of a place in this connection :

The earliest period of life is the best for the cultivation of the musical faculties. The musical organs are then easily developed. The age of six or seven is the best for learning to sing. Voice and ear, so obedient to external impressions, are rapidly developed and improved.

Some children, who at first show but few signs of musical gifts, some sooner than others, develop the best voices.

Children by being brought together in classes stimulate each other to activity, thus the influence of singing upon the voice and ear, and on the health and morals of the pupils, will be increased tenfold when aided by the participation of numbers in this pleasurable exercise. And so we find that children interested in their singing lessons at school will carry its influence into their habits and dispositions, and to their moral characters.

No one can expect to be great as a vocalist or a musician unless educated while young. The great masters were trained in childhood.

It is found in our lower grades of school that ninety-five per cent. of the children can sing, in the higher grades the per cent. is not so large. The reasons are obvious, the difficulties to be overcome are greater than with the younger pupils, so that in many cases it is almost impossible to succeed.

DISCIPLINE AND DEPORTMENT. .

The first great requisite in a teacher is ability to govern. A pupil knows at a glance whether he is to rule or to obey. He knows the weakest points in his teacher's qualifications, and he will attack him there as readily as a military commander will seek, and direct his forces upon, the weakest part of a fortress or the wing of an army most feebly supported. The teacher should have similar shrewdness and gain access to the fortress of his pupil's heart by the easiest approach. He must not apply the same rule to all, though he must bring all under the same authority. He may reduce one to sub-

mission by a word, another by a process of reasoning, and all it may be without resort to force, and certainly without the least mental excitement—the first indication of anger. But when necessity requires, he must break down all obstinacy, though it be with the terrible power of physical force. The pupil must yield wholly and unreservedly, but in the moment of submission, the smile of reconciliation should beam from the face and words of kindness fall from the lips.

Most of our teachers succeed without resort to corporal punishment, though some—too many—adopt it as the prevailing mode, and apply the rod when a milder application of words will produce the more speedy effect. As in the old fable, words first and stones last, and only in the event of a failure of milder methods.

PUBLIC INTEREST IN SCHOOLS.

Though our schools receive during the year—particularly at examinations—a large number of visitors, there is but comparatively a small proportion of our citizens who ever go inside the school room. Not one tax-payer in fifty has given the teacher occasion to register his name. There have been periods when for a whole year, and even a succession of years, the mayor of the city, members of the board of aldermen and council, have not visited a school, and we have had members of

the school committee who have followed their example. During the past year the mayor has visited every school in town, and set an example for other citizens to follow, and members of the school committee have made more regular visits than any of their predecessors.

It is not enough to make appropriations and build houses, provide books and elect officers. It is not all that is demanded, to preach to children of the importance of learning, nor to talk earnestly of popular education. The presence of the parent in the school is desired, not on examination days only, when the boldest and perhaps poorest scholars appear the best, but when the school is in its natural condition. Such visits are more important than those of committees and superintendents: more valuable even than any agency beyond the appropriation of pecuniary means and the employment of well tried teachers.

From this report you will perceive that our schools are in a comparatively prosperous condition—that they are generally under the direction of earnest, faithful, competent teachers: that they are composed of intelligent, obedient and happy pupils, and that they maintain an honorable name in comparison with other schools, and constitute one of the most valuable blessings afforded our city. Let us regard them as our pride and cherish them with paternal care. They are the true indices of

our moral and intellectual progress, and should receive our constant encouragement. They contribute to our municipal growth and prosperity, and claim our most liberal support.

JAMES O. ADAMS,

Superintendent of Public Instruction.

WINTER SCHOOLS.

A brief statement of the condition of the various Schools, under the charge of teachers not noticed in the foregoing report, is herewith submitted. District No. 1, has had a quiet, orderly and profitable school. In No 2, the teacher of the Intermediate School has labored with great fidelity, but has failed to maintain such order as the interest of the pupils has demanded. This is the most difficult School in the city, and it matters little how good a scholar the teacher may be, nor how successful have been his former labors, he must possess unusual tact to manage this school. Other schools in No. 2 have remained unchanged during the term.

In No. 3, the School has been entirely unsatisfactory to the Superintendent and those members of the Committee who have visited it. The teaching has been good, but the deportment exceedingly bad. Much to our surprise, the people of the District have appeared to be satisfied.

In No. 4, the School is under the same teacher as last Winter, with similar success.

No. 5 has a new teacher, who has labored with diligence and afforded satisfactory evidence of his faithfulness.

The School in No. 6 has been marked by no special features. Although it has been the subject of but little complaint, it has not deserved a very favorable consideration.

In No. 7, there has been a superior School, though it has not always manifested superior order..

No. 8 has an excellent School, quiet, orderly and studious. The teacher in No. 9, has pursued the same course adopted last winter, with equally good results.

In No. 10, the new Middle School has attained to a respectable condition, and with perseverance, the teacher will accomplish a good work.

At Amoskeag, the Primary School has greatly improved during the term. The Grammar School has been generally very orderly and made fair progress in the required studies.

March 7, 1862.
